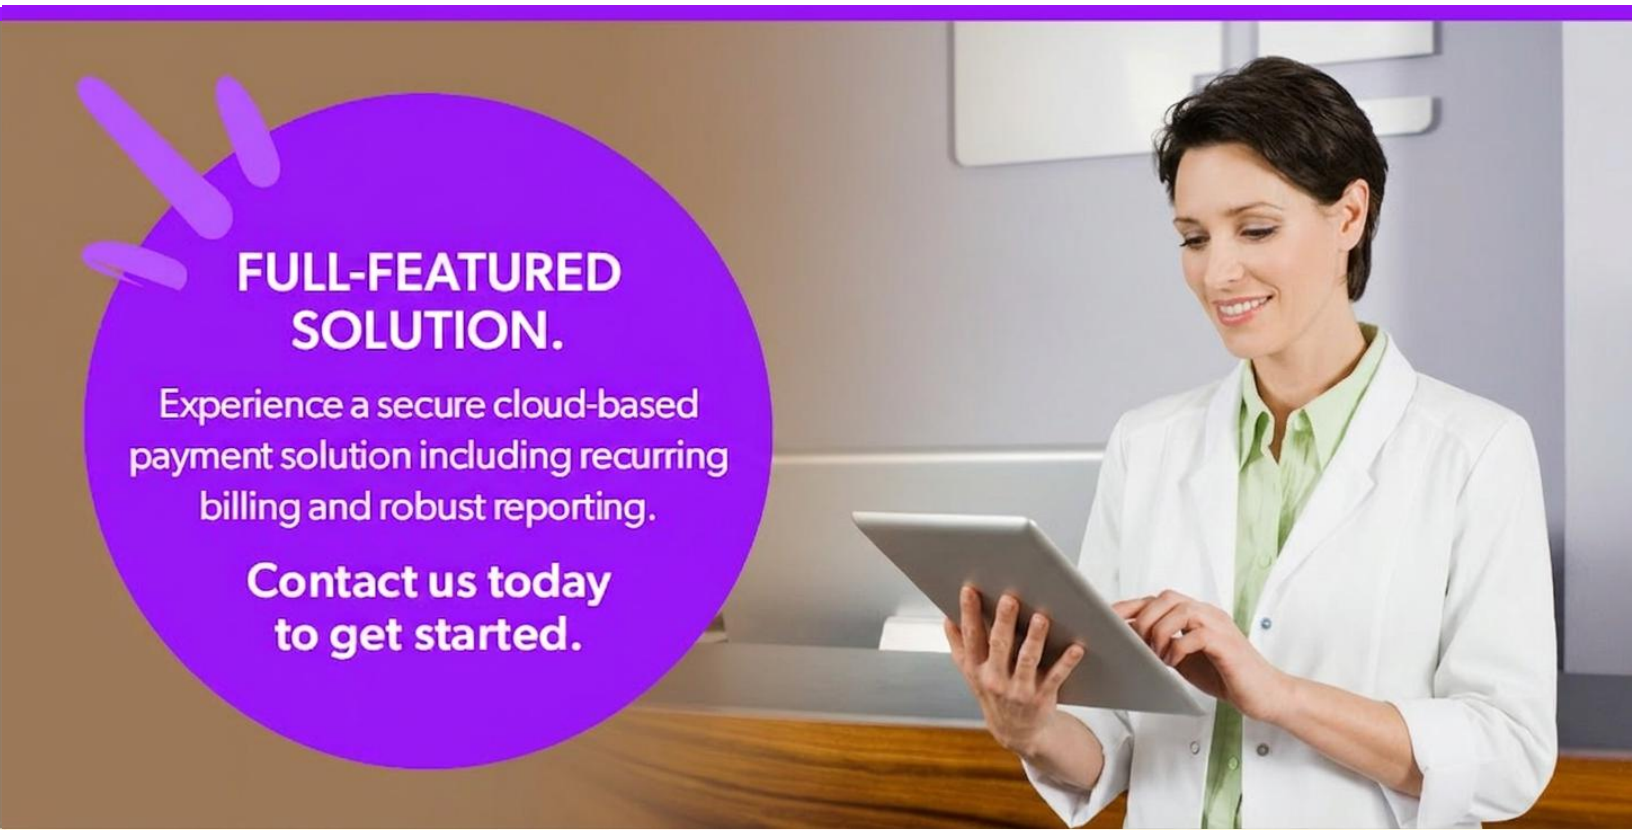
CloudPOS Virtual Terminal

Fast, eficient, and secure transactions in the cloud.



Automated Recurring Payments for Streamlined Operations

Transform your payment system with the CloudPOS automated recurring billing feature. From bi-weekly to quarterly billing, it is quick, easy, and secure, allowing merchants to focus on growing their businesses.

Optimized Level 2 and 3 Payment Support

CloudPOS supports Level 2 and Level 3 transactions, ideal for large B2B and Government-to-Business sales, minimizing interchange costs and providing detailed transaction data for enhanced financial control.

Virtual Terminal & PIN Pad Integration

Reduce interchange costs for in-person sales by initiating transactions from your computer using Cloud POS (Virtual Terminal).

Secure Payment Link

Eliminate manual errors by sending secure payment links directly to customers, Streamline card-not-present transactions, and provide easy payment monitoring and reporting.

SPIn: the semi-integrated EMV solution.

SPIn is fast, easy and secure.

SPIn is simple

SPIn is omni-channel and that means developers need just one solution for in-store, online, mobile and back-ofice solutions. REST API, JSON, and XML interface options. Turnkey API.

SPIn is easy

Direct payment processing certified and maintained by Dejavoo. Forget manual updates. SPIn's auto-update feature keeps the latest version of the software ready to go.

SPIn is fast

Lightning-fast connectivity (under 1 second). Fast transaction upload and reporting, USB, Ethernet, Wi-Fi, Bluetooth, 3G and 4G connections.

SPIn is secure

SPIn maintains PCI DSS compliance in all Dejavoo terminals. And there's more including, digital receipt repository, risk management, and email batch notifications with DeNovo Services.
