Authorize.net® Payment Gateway Solutions

Accept online, in-person, phone, and recurring payments through a secure gateway supported by Tidewater Payments.

A trusted gateway solution for businesses of every size

Tidewater Payments is proud to be an Authorized Reseller of Authorize.net®, a Visa Solution. Authorize.net provides the secure connection between your website, software, shopping cart, point-of-sale system, or virtual terminal and the payment processing network.

AT A GLANCE

Flexible payment acceptance
Accept credit cards, debit cards, digital wallets, ACH/eCheck payments, and other supported payment methods.

Built for secure transactions
Use fraud tools, tokenization, encryption, and hosted payment options to support safer payment acceptance.

Works with your business model
Support eCommerce, recurring billing, phone orders, mail orders, service teams, and supported in-person environments.

Guidance from Tidewater Payments
Get help with gateway setup, configuration, integration considerations, and ongoing payment processing support.

KEY BENEFITS

- Secure payment processing
- Credit card, debit card, and digital wallet acceptance
- Fraud detection and risk management tools
- Recurring billing and subscription support
- Customer information management with tokenization
- Easy integrations with hundreds of platforms
- PCI-compliant payment infrastructure
- Detailed reporting and transaction management

PAYMENT ACCEPTANCE CAPABILITIES

Online Payments
Accept payments through your website, eCommerce store, customer portal, or custom application. Supported methods can include Visa, Mastercard, American Express, Discover, Apple Pay, Google Pay, PayPal where supported, and ACH/eCheck payments.

Recurring Billing
Support subscriptions, memberships, service contracts, retainers, SaaS billing, and other repeat payment models.

Virtual Terminal
Process payments securely from a web browser for phone orders, mail orders, back-office teams, and customer service environments.

Mobile & In-Person Payments
Connect Authorize.net with supported terminals and point-of-sale solutions for a more unified payment experience.

INTEGRATION SOLUTIONS

Authorize.net is designed to integrate with many leading website, shopping cart, and business software platforms. This allows your business to keep its current workflow in many cases while adding secure gateway functionality.

- WooCommerce
- BigCommerce
- Volusion
- Magento / Adobe Commerce
- OpenCart
- Shopify
- PrestaShop

Custom API Integrations

Developers can use Authorize.net APIs to build custom checkout experiences, recurring payment workflows, customer payment profiles, and transaction management solutions.

Hosted Payment Forms

Hosted payment pages and embedded checkout options can help reduce PCI scope by keeping sensitive payment entry within a secure payment environment.

ADVANCED SECURITY FEATURES

Fraud Detection Suite™

- Transaction velocity filters
- Address Verification Service (AVS)
- Card Code Verification (CVV)
- IP address filtering
- Suspicious transaction monitoring

Tokenization

FREQUENTLY ASKED QUESTIONS

Do I need a merchant account?
Yes. Authorize.net is a payment gateway and requires a merchant processing account to settle transactions.

Can I keep my existing website?
In most cases, yes. Authorize.net integrates with hundreds of platforms and can often work with your existing website or business software.

Does Authorize.net support recurring billing?
Yes. Automated recurring billing is available for businesses that need subscription, membership, contract, or repeat payment options.

Is Authorize.net PCI compliant?
Authorize.net maintains robust security standards and provides tools that support PCI compliance efforts.
